

CAREER OBJECTIVE

Computer Science student with foundational knowledge in Cloud, DevOps, and DevSecOps, and hands-on exposure to AWS, Docker, and CI/CD pipelines. Seeking an opportunity to learn, build, and contribute to scalable, automated, and secure software and infrastructure solutions.

EDUCATION

Sri Eshwar College of Engineering - B.E Computer Science and Engineering	CGPA 8.19	2023-2027
Dr.V.Genguswamy Naidu Matric Higher Secondary School - HSLC	93.67%	2022-2023
Dr.V.Genguswamy Naidu Matric Higher Secondary School - SSLC	PASS	2020-2021

INTERNSHIP

Cloud Computing Intern - vSphere Technologies 2025

- Worked with AWS services including EC2, S3, VPC, DynamoDB, and Route53 to understand cloud infrastructure and networking fundamentals.
- Learned cloud service models such as IaaS, PaaS, and SaaS and different cloud deployment models.
- Configured and managed AWS resources to gain hands-on experience with cloud environments.

MERN Stack Intern - Better Tomorrow 2025

- Explored MERN Stack technologies including MongoDB, Express.js, React.js, and Node.js.
- Built a simple React.js web interface using HTML, CSS, and JavaScript to implement component-based and responsive UI.

CERTIFICATIONS

Microsoft Azure Fundamentals (AZ-900) - [Microsoft](#) | 2026
AWS Certified Cloud Practitioner (CLF-C02) - [Amazon Web Services](#) | 2026
Python Programming - [Udemy](#) | 2025
Database Management System - [NPTEL](#) | 2024

PROJECTS

NoteVault : Tech stack : Node.js, Express.js, MongoDB, Docker [GitHub](#) 2026

- Built a full-stack app with multiple containers using Docker and Docker Compose. This made it easy for the frontend, backend, and database to talk to each other through internal networking.
- Built RESTful APIs with Node.js and Express that support all CRUD operations, and used Docker volumes to connect MongoDB with permanent storage.
- Used layer caching to speed up container builds and docker-compose to make deployment easier, which made development faster and more consistent.

CloudStatic : Tech stack : AWS (S3, IAM), HTML, CSS [GitHub](#) 2026

- Deployed a static website on AWS S3 for cloud-based hosting.
- Configured S3 bucket policies and IAM permissions to enable secure public access.
- Implemented cloud storage hosting using AWS services for scalable static website deployment.

FlaskOps : Tech stack: Python, Flask, Docker, GitHub Actions [GitHub](#) 2025

- Containerized a Flask web application using Docker to ensure consistent application deployment.
- Automated Docker image build workflows using GitHub Actions for CI/CD pipeline integration.
- Improved deployment consistency across environments using containerization and CI/CD practices.

SKILLS

Cloud Platforms - AWS (EC2, S3, IAM, VPC), Microsoft Azure (Virtual Machines, Resource Groups)

DevOps & Automation - Docker, GitHub Actions, CI/CD Pipelines, Continuous Integration, Continuous Deployment, Ansible, Terraform

Version Control & OS - Git, GitHub, Linux (Basic Commands, File System, Permissions)

Programming / Scripting - Python

Web Technologies - HTML, CSS, JavaScript, React.js

ACADEMIC ACHIEVEMENTS

Completed NPTEL Cybersecurity course with a score of 97% - [Certification link](#)
